

A100: Individual Assignment 2

2a: Reading

- Read the [Agile Manifesto](#) and the [12 Principles](#) (this is a total of 17 sentences). What makes these values so compelling and so different from traditional (Waterfall) project management?
- Read the portion of this Atlassian article [Comparing Workflows](#), that focuses on the *Centralized* and *Feature-Branch* Workflows. Be prepared to compare & contrast these in discussion.
- Advanced: Look at the *Gitflow* and *Forking* Workflows and be prepared to explain these to your peers.

2b: Personal Website

Add content to your personal website. Integrate feedback from others on good code practices. Must meet these requirements:

- Commit meaningful units of work, and push to your remote repository (nameResumeSite). Also, host at gh-pages. (Do this by creating a gh-pages branch, NOT a github.io repo).
- HTML5-compliant (No inline style; style classes, not just individual divs, etc.)
- Should render well on a mobile device as well.
- You must be proud of it.

2c: Code Review

Give meaningful, actionable feedback to your buddy at StudyHall on their web resume.

Focus on:

- Clean, HTML5-compliant code
- Attention to detail (color, font, margins)
- Relevance of the content to a software dev job
- Telling their Story
