

Week 03 Assignments

1. Sign up for Trello & Slack before Demo Day.

2. Complete steps 1, 2, 4, & 5 of [How To Guide](#).

This covers how to install Meteor and set up a team repository on GitHub.

Only one member from each team will complete step 3.

3. Continue updating your Personal Website.

Get it ready for Week 4's Design & Coding Evaluation.

One member of your team should:

1. Set up a shared Slack channel and Trello board.

Ensure that every team member can access these tools.

2. Complete Step 3 of How To Guide.

We'll set up a private repo in our Github organization account for you to use.

As a team you should:

1. Meet & review the Project Charter, Personas, Stories, & Backlog.

Document any questions you have in a list.

2. Meet with your Product Owner as soon as possible.

After this meeting, prototype/mockup the stories in a format you can upload to Drive. *Plan to demo these Stories on Friday.*

3. Work on completing the front-end for your highest priority Story.

Push to your team's private repo before Demo Day.

Show your Github repo in your demo as proof.

Demo format: 15 minutes. Additional 5 minutes for feedback/Q&A.

Introduce yourselves and indicate what each of you will cover in the Demo.

Demo *Definition of Done*, along with the underlying estimates.

Demo any prototypes/mockups of the underlying *Stories*.

Demo any completed *Stories* and include any code built so far.

Close with questions you have for Product Owner and next steps.

See you at Demo Day!
