

# Individual Demos

*An Algorithm for Success*

- 1. Introduce yourself.**
- 2. Explain the purpose of your project & what was interesting to you.**
- 3. Bring up your project and walk through It.**
- 4. Walk through one piece of code.**
- 5. Conclude, thank the audience, invite questions.**

### **How to introduce yourself:**

Say your name slowly and clearly.

Tell the audience:

where you currently work or your major, year in school, & University.

**Breathe.**

**Smile!**

## What is the Project?

### **Explain the purpose of the project.**

Include any areas you wanted to focus on during development.

These areas can be tools, learning a language, design choices, etc.

### **Demo the features & functions of your project.**

Bring up your website.

Guide the audience through its key functionality & features.

What was ONE thing that was interesting or challenging about this project?

**Show code for the interesting/challenging thing you identified.**

Why was it difficult? How did you solve it? Why was it valuable experience?

Use your editor or slides. Focus on only the relevant code.

### **Conclude with next steps or reflection on experience.**

Thank the audience for listening.

Restate your name and your project's name.

Invite the audience to ask questions.
